

## Ganges Nirvana Community Mission

As the modern, Buzz Lightyear might say:

**"To sustainability, and beyond!"**

Sustainability Goal:

- + Traveller's can come and stay for an affordable rate
- + Those who choose can contribute to the projects that earn an income for the community. This will offset their individual financial contribution.
- + What options are currently being looked at?
  - A rooftop 'invite only' café served by the traveller's
  - A ground-floor community hostel

'And Beyond' Goal:

- + Connect with the youth and share through simple interactions
- + Share what we know as conscience traveller's to build-up the Kingdom lands between Varanasi and Nepal
- farmer's in India, like much of the world, are changing to integrate the wisdom of the past with the advances of the modern age

What happens from the start?

- 1) Clear out the trash and rubbish from construction of the community floor
- 2) Buy mattresses, pillows, sheets, and other necessities to first accommodate the travellers who are building the community through time
- 3) Build a kitchen on the community floor
- 4) Build bathrooms and showers on the community floor
- 5) Expand to the rooftop

How do we get there?

- 1) Donations from those who have come before
- 2) Sponsorship from Random Acts
- 3) Gita helping in the kitchen and caring for the house
- 4) Pappu Dubeji helping with the handyman tasks
- 5) Mason workers and other labourers are hired
- 6) Traveller's time and effort and participation
- 7) Shashwat's endless thinking, doing, socializing, and most importantly →

**FEELING FROM THE HEART**

Share what makes you, you.
